tyschumacher.me GitHub LinkedIn

Senior full stack and product engineer with 10+ years across commerce, sportsbook, trading, banking, and applied AI. Current freelance client: Remorseless Records. Builds accessible React and TypeScript interfaces and reliable Go, Java, and Node.js services.

EXPERIENCE

Freelance Jul 2025 to Present
Senior Full Stack and Product Engineer Buffalo, New York

- Develop the Remorseless Records commerce platform with React, Next.js, TypeScript, and Medusa for catalog management, publishing, search, and Admin workflows.
- Integrate Stripe checkout, payment recovery, refunds, and order reconciliation with Medusa as the commerce authority.
- Improve accessibility, responsive layouts, security, CI, deployment checks, and database and media recovery.

Caesars Sportsbook Dec 2021 to Oct 2026
Senior Full Stack Developer Jersey City, New Jersey, Remote

- Designed Go and Java integrations that normalize provider data for live betting products and keep market interfaces current as data changes.
- Delivered accessible React workflows for live odds, trader operations, and analytics, using list virtualization to preserve responsiveness during continuous updates.
- Combined FullStory evidence with trader feedback to prioritize and ship usability improvements for operational workflows.
- Led technical design reviews and mentored engineers across interface and service delivery decisions.

Instinet Dec 2017 to Dec 2021
Senior Full Stack Developer New York, New York

- Built Node.js and Java services for electronic trading workflows, balancing throughput, reliability, and compliance requirements.
- Replaced legacy Flash workbenches with modular React tools for traders and engineering teams, improving maintainability and release independence.
- Strengthened GitLab CI and Kubernetes workflows with clearer release inspection and recovery paths.

Lab49 Jun 2017 to Dec 2017
Front End Developer New York, New York

- Built accessible React research portals and Java service integrations for banking clients, meeting compliance and performance requirements.

Twisted Rope Oct 2015 to Jun 2017
Full Stack Web Developer Buffalo, New York

- Built responsive React and Node.js applications for hospitality and retail, establishing reusable interface patterns across client work.

SELECTED PROJECTS

Stackctl Go, Bubble Tea, Podman, PostgreSQL

Created reproducible local service stacks with stable JSON contracts, health diagnostics, release checksums, SPDX SBOMs, and artifact attestations.

Relantern Go, Next.js, PostgreSQL, pgvector

Built a developer intelligence platform with hybrid retrieval, reciprocal rank fusion, structured LLM outputs, evidence validation, cost controls, and offline evaluations.

SKILLS

Frontend	TypeScript, React, Next.js, Tailwind CSS, Zustand, TanStack Query
Backend & APIs	Go, Java, Node.js, Spring Boot, GraphQL, gRPC
Data stores	PostgreSQL, Redis
Messaging	Apache Kafka, NATS, WebSockets, Server Sent Events
Infrastructure	Kubernetes, Docker, Podman
