I build accessible React and TypeScript interfaces and services in Go, Java, and Node.js. My experience spans live sportsbook products, electronic trading, and financial applications, with a focus on usability, performance, and reliable releases.

EXPERIENCE

Caesars Sportsbook

Senior Full Stack Developer

Dec 2021 to Present
Jersey City, NJ · Remote

- Created Go and Java services that normalized data from live providers and kept betting interfaces current during major events.
- Built React screens for live odds, trader tools, and internal analytics, with virtualized lists and accessible controls for use during long sessions.
- Used FullStory sessions and trader feedback to identify usability problems and prioritize fixes.
- Mentored engineers, reviewed designs, and helped teams make delivery decisions.

Instinet

Senior Full Stack Developer

Dec 2017 to Dec 2021
New York, NY

- Built Node.js and Java services for a trading platform handling large transaction volumes and strict compliance requirements.
- Replaced legacy Flash workbenches with modular React tools that were easier for traders to use and teams to maintain.
- Improved GitLab CI pipelines and Kubernetes deployments to make releases easier to inspect and recover from failures.

Lab49

Front End Developer

Jun 2017 to Dec 2017
New York, NY

- Built React interfaces for bank research portals and collaborated with Java backend teams on accessibility, compliance, and performance requirements.
- Worked with product and legal teams to turn complex requirements into screens and services engineers could build.

Twisted Rope

Full Stack Web Developer

Oct 2015 to Jun 2017
Buffalo, NY

- Built responsive React and Node.js apps for hospitality and retail brands, with reusable UI patterns for campaign work.
- Added analytics and SEO improvements so clients could measure campaign performance and plan future work.

SKILLS

Languages & interfaces: TypeScript, Java, Go, React, Next.js, Tailwind CSS, Zustand, TanStack Query.

Backend & APIs: Node.js, Spring Boot, PostgreSQL, Redis, GraphQL, gRPC.

Messaging & live systems: Apache Kafka, NATS, WebSockets, Server Sent Events.

Delivery & observability: Kubernetes, Docker, Podman, Grafana, OpenTelemetry.

EDUCATION

SUNY New Paltz

Bachelor's degree in Computer Science

Aug 2011 to May 2015
