Professional Summary

Full stack engineer with over 10 years of experience building web applications and backend services. My work spans live sportsbook data, electronic trading, and internal tools, with a focus on usability, performance, and reliable releases.

Professional Experience

Caesars Sportsbook

Senior Full Stack Developer

Jersey City, NJ, USA

December 2021 to Present

- Built and maintained Go services that integrate live data providers and process concurrent updates for betting interfaces and internal tools.
- Led the design and implementation of React interfaces for live sports data and internal tools, using virtualization to keep large lists responsive.
- Used FullStory sessions and trader feedback to identify usability problems and work with the team on design changes.
- Led team planning and mentored engineers to improve delivery quality and collaboration.

Instinet

Senior Full Stack Developer

New York, NY, USA

December 2017 to December 2021

- Built and maintained Node.js and Java services for a trading platform, improving throughput and reliability while meeting compliance requirements.
- Replaced Flash tools with modular React applications that were easier to maintain and extend.
- Improved GitLab CI pipelines and Kubernetes deployments to make application releases more consistent.

Lab49

Front End Developer

New York, NY, USA

June 2017 to December 2017

- Worked with investment banks and asset managers to design and maintain web applications for their users.
- Built React, Redux, and SCSS interfaces in collaboration with Java backend teams.

Twisted Rope

Full Stack Web Developer

Buffalo, NY, USA

October 2015 to June 2017

- Built React and Node.js applications for enterprise clients and marketing teams.
- Designed responsive pages for product campaigns, improving usability and visibility in search results.

Education

SUNY New Paltz

Bachelor's degree in Computer Science

August 2011 to May 2015

Skills

React.js, TypeScript, Go, Node.js, PostgreSQL, HTML/CSS, Rust, REST APIs, GraphQL, MySQL, Kubernetes, Redux.js, SEO, Web Development.
